

A Virtual Reconstruction Of Apostolos Andreas Monastery And Hala Sultan Tekke Mosque With The Use Of Multimedia And 3d Animation

Summary

The project aims at reconstructing virtually the Apostolos Andreas Monastery and the Halan Sultan Tekke Mosque through the development of two interactive multimedia applications to be installed at the monument sites. With information about the history and functions of these religious sites, the multimedia applications will help Greek and Turkish Cypriots understand and appreciate better each other's religious background.
